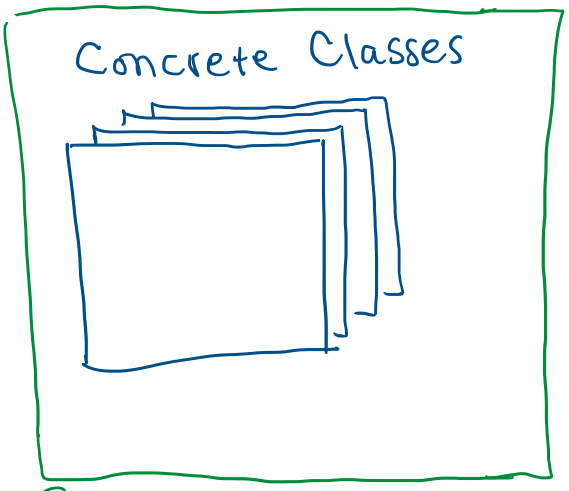
C4P111 Factory Pattern

Wednesday, May 15, 2024 5:55 PM

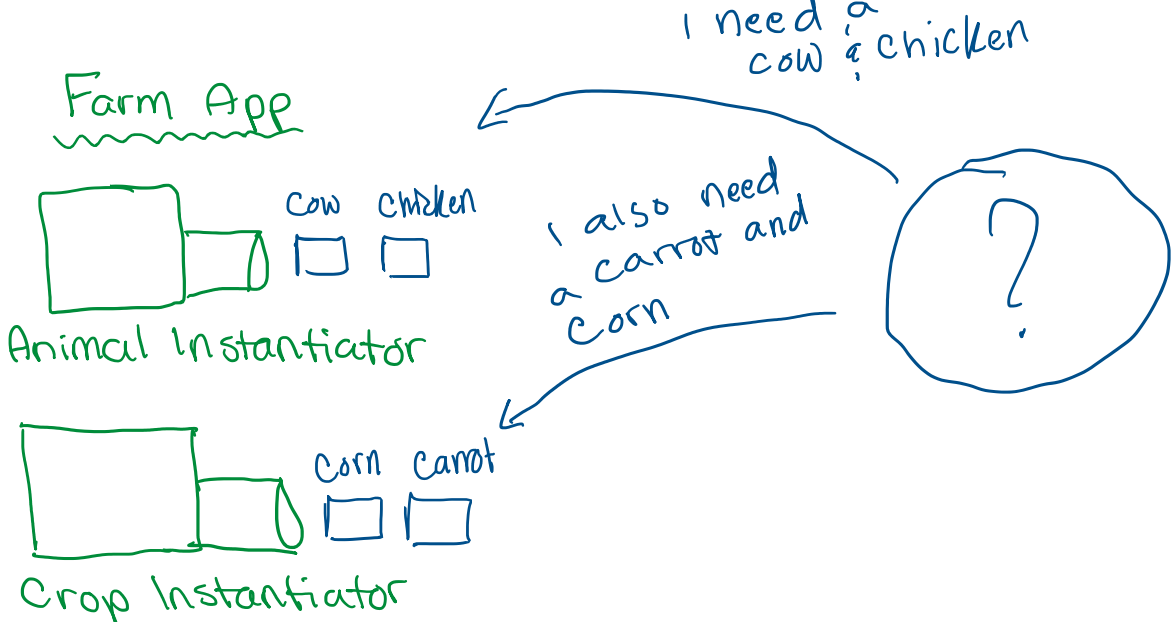
How would I take all parts of my application that instantiate concrete classes and seperate them from the rest of the app?



Part of application that instantiates concrete classes

(PAICC)

(Roa)



Move the PAICC functionality to their own files / classes where they can instantiate the needed objects.

↳ its only job is to return the instantiated object.
