

C4P121 Factory method

Wednesday, May 15, 2024

6:43 PM

Chicago style

Pseudo-code is

public class ChicagoStore extends PizzaStore:

 Pizza createPizza (string item):

 if (item.equals("<<typing>>")):
 return new TypingOf Pizza ()

 else if (item.equals("<<typing>>")):
 return new TypingOf Pizza ()

 ...

 return null.

} Used a sw
statement
if availa

↑ For the sake of time...
same implementation for California style Pizza
